Novelty (N)	Claims <u>1-7</u>	YES
	Claims _____	NO
Inventive step (IS)	Claims <u>1-7</u>	YES

2. Citations and explanations (Rule 70.7)

The **closest prior art** appears to be DE-A-100 20 172; the applicant has given comprehensive details of this document in the introductory part of the description and it corresponds to the plurality of features in claim 1.

Problem: to devise a handle for doors or hinged flaps in motor vehicles, which handle can be manufactured in a straightforward and cost-effective manner.

Solution: by means of the characterising features of claim 1, whereby the handle consists of two units, one of which is manufactured as an integral piece from three plastics components, using an injection moulding technique, whilst the other is an insert unit consisting of a plurality of components and can be inserted into the first unit.

The available prior art contains nothing to suggest this configuration of the known handle for a motor.

The subject matter of claim 1 appears to satisfy all the requirements of PCT Article 33(2), (3) and (4).
